

Qadha is a bilingual AI-powered coaching platform that helps job seekers and professionals practice interviews and presentations — getting real-time analysis, personalized feedback, and model answers powered by state-of-the-art AI, all in Arabic and English.

• THE PROBLEM

- Most people never practice interviews before the real thing — and it shows
- Professional coaching is expensive and inaccessible to many job seekers
- Generic feedback tools don't adapt to role, experience, or language
- No dedicated Arabic-language interview practice platform exists
- Presentation skills rarely get structured, actionable feedback

• THE SOLUTION

- AI generates tailored questions based on role, education & experience level
- Whisper Large V3 transcribes spoken answers with high accuracy
- GPT-4o scores performance: communication, confidence, answer quality
- Ideal model answers generated using STAR method per question
- Full bilingual support — switch between Arabic and English instantly
